LEANDRO DE SOUSA

iOS Software Engineer | Swift • UIKit • SwiftUI • Mobile Architecture

Dublin, Ireland

+55 92 99436-7105 | contato@leandrodesousa.dev | www.leandrodesousa.dev

PROFESSIONAL SUMMARY

iOS software engineer with 6+ years of professional experience building and maintaining native mobile applications, primarily in banking, payments and investment products. Experienced in Swift, UIKit, SwiftUI, mobile architecture, legacy modernisation, automated testing and CI/CD. Contributed to architectural decisions, technical mentoring and cross-functional delivery in large engineering teams. Relocating to Dublin on 25 October 2026; available for remote interviews before arrival.

CORE SKILLS

Languages & frameworks: Swift, UIKit, SwiftUI | Architecture: MVVM-C, MVP, VIP, VIPER, TCA | Testing: XCTest, QuickSpec, Nimble | Delivery: Git, Fastlane, Semaphore CI, App Store distribution | Tooling: SPM, CocoaPods, Tuist, SwiftLint | Product: REST/JSON APIs, Firebase, GA4, Datadog, accessibility (WCAG 2.1), Agile/Scrum/Kanban

PROFESSIONAL EXPERIENCE

iOS Developer | NTT DATA — C6 Bank project *Dec 2025 – Sep 2026*

- Contributed to payment-link management features for business customers in a native iOS banking application.
- Supported evolution of MVP architecture and modularisation practices using Tuist and Swift Package Manager, with a focus on maintainability and testability.
- Implemented and maintained unit tests with QuickSpec and Nimble; collaborated across teams on architecture, code quality and technical problem-solving.

iOS Developer | Itaú Unibanco *Dec 2022 – Nov 2025*

- Contributed to architecture design and refactoring using MVVM-C, VIP and VIPER across banking support and customer messaging features.
- Mentored junior and mid-level developers through code reviews, troubleshooting and architectural discussions.
- Led initiatives involving Google Analytics 4 and Datadog; modernised accessibility features using UIKit accessibility APIs and WCAG 2.1 guidance.
- Worked on help-centre and chat experiences, including architectural discussions for AI-assisted customer service; supported Swift code-generation documentation and tooling.

iOS Developer | Storm Group — Warren Investments project *Jun 2022 – Nov 2022*

- Built and maintained SwiftUI investment-app screens using The Composable Architecture (TCA); implemented tests with XCTest and TCA testing utilities.
- Managed dependencies with CocoaPods and Swift Package Manager and resolved targeted application defects.

iOS Developer | TQI — PagBank project *Sep 2021 – Jul 2022*

- Delivered and maintained features across PIX, bill payments, shopping and account home; supported important seasonal releases.
- Provided technical mentoring and pull-request reviews; led CocoaPods modularisation and legacy refactoring.
- Used Firebase Remote Config, A/B testing and analytics tooling to support product evolution.

iOS Developer | T10 — Shopper project ***Jan 2021 – Sep 2021***

- Independently refactored major navigation flows from a growing MVP into MVVM-C, addressing legacy defects and improving code organisation.
- Configured CI/CD with Fastlane and Semaphore CI; automated app distribution and signing workflows using Fastlane Match.
- Investigated IoT integration approaches for connected-device features.

iOS Developer | TQI — PagBank project ***Jan 2020 – Dec 2020***

- Developed bill-payment features and REST/JSON API integrations; used MVVM-C, XCTest and SwiftLint.
- Collaborated with backend, UX/UI and product teams on API contracts and requirements; documented troubleshooting and delivery processes in Confluence.

EDUCATION & TRAINING

Apple Developer Academy — Instituto Eldorado | iOS Development Programme | Apr 2018 – Dec 2019
